True or False?

Read the following statements related to the article “Understanding a New Virus” (pp. 2-3). Circle *True* if the statement’s information is true and *False* if the statement’s information is false. Then provide evidence from the article to explain your choice.

True **False** 1. A vaccine can slow a virus’s spread.

True **False** 2. The viruses that are spread by an infected person’s sneeze aren’t harmful.

True **False** 3. Handwashing with either warm or cold water helps get rid of viruses.

True **False** 4. Touching your face increases your chances of getting sick from a virus.

True **False** 5. There’s only one way to keep a disease from spreading.

→ **TAKE IT FURTHER:** On a separate piece of paper, revise the “False” statements so that they become “True” statements.
